Technologies Summary:

- *Code:* Java, JSP, PHP, Javascript, HTML, CSS, Perl, Python, TCL, Ruby
- *Java/J2EE:* Tomcat, Struts, Weblogic, Eclipse, Documentum, Hibernate, Spring, Websphere.
- *Data:* XML, Access, Progress, SQL Server, Oracle, MySQL, DB2, Sybase
- *Platforms:* Windows; Unix: SCO, HP-UX, Tru64, BSD, AIX, etc.; Linux

2007 Enterprise Scripting:

PHP Contractor

itaas **Johns Creek, GA** **Nov 2007 – Present**

Employed own MVC framework (<http://code.google.com/p/barebonesmvc-php>) to convert 70+ HTML pages to dynamic PHP content to meet one month deadline, while leading a number of other developers

Technologies: Linux, PHP, Javascript, Awk, Samba

PHP Developer

Vitrue **Atlanta, GA** **Aug 2007 – Nov 2007**

Supported deployments of social networking platform by developing a tool for testing protected methods, as well as a web based interface to XDebug function trace data.

Technologies: Linux, MySQL, PHP, Solaris, Subversion

Java/Python Contractor

Crosstel **West Point, GA** **May 2007 – July 2007**

Performed necessary analysis and created high level architecture documentation for proposed system to enable pre-payment of cable/internet/phone service for Knology, including initial prototyping of web interface using a mod_python port of own PHP MVC framework, while leading one junior developer.

Technologies: Python, Oracle, MySQL, mod_python, Linux, Java, JDBC, Apache, RCS, Samba, Eclipse

PHP Contractor

Yahoo! **Atlanta, GA** **Jan 2007 – May 2007**

Maintenance of PHP applications for delivering software such as Messenger and Jukebox to customers of Yahoo!'s various Broadband partners

Technologies: Unix/BSD, PHP, Perl, Javascript, Awk, AJAX

Extra-vocational, 2005-08:

- *April 2008:* Scheduled to give *another* spoken presentation to Atlanta PHP Users (see Oct 2006)
- *Jan 2008:* Completed paid review of first draft of manuscript for Pearson publishing of an upcoming book by a leading object-oriented consultant.
- *July 2007:* Released BareBonesMvc framework for php on Google Code; has been downloaded nearly 1000 times in ensuing 6 months (<http://code.google.com/p/barebonesmvc-php>).
- *June 2007:* Performed paid review of technical manuscript proposal for Pearson publishing
- *Jan 2007:* Performed paid technical manuscript review of Manning's "Spring in Action" 2nd. ed.
- *Nov 2006:* Performed paid technical manuscript review of Pearson's "Scripting in Java"
- *Oct 2006:* Gave spoken presentation to Atlanta PHP Users (<http://www.atlantaphp.org/archive/42>)
- *Feb 2005:* Spoken presentation to Nashville PHP Users with extensive notes on new OO features in PHP5 (<http://web.archive.org/web/20050219133253/scriptify.com/output/spoken/2005/sp1/>)

Java/J2EE 2004-06:

Senior Software Engineer

CompuCredit Atlanta, GA **Nov 2006 – Jan 2007**

Debugged code base “frozen” (between releases) and found defect causing thousands in lost revenue due to un-reviewed offshore code employing custom URL encoder that overlooked new lines.

Technologies: DB2, Documentum, Eclipse (WSAD), Java, Ruby, WebSphere, XML.

Senior J2EE/Web Contractor

CypressCare Duluth, GA **May 2006 – Sept 2006**

In five months delivered departmental application that had been promised for previous year and a half, overcoming a bug in Struts (reported and acknowledged) along the way

Technologies: Eclipse, Hibernate, HTML, Java, Javascript, JSP, SQL Server, Struts, Tomcat, XML.

***Work endorsed on linkedin*

Senior J2EE/Web Contractor

Shaw Industries Dalton, GA **Mar 2006 – May 2006**

Introduced significant refactorings while maintaining hybrid Struts application, including a new abstract class to do away with cut-and-paste stub implementations required by the custom framework's primary front controller interface.

Technologies: Eclipse (WSAD), HTML, Java, Javascript, JSP, SQL Server, Struts, Transact-SQL, WebSphere, XML.

Senior Software Engineer

Optio Software Alpharetta, GA **Jan 2006 – Feb 2006**

Developed controllers and their corresponding unit tests for TurboGears/Python web application

Technologies: AJAX, Eclipse, Javascript, JSON, JUnit, Python, TurboGears

Java/Documentum Contractor

The Southern Company Atlanta, GA **Nov 2005 – Jan 2006**

Developed custom JSP tags to help maintain Documentum web application, and generated Excel spreadsheets from XML configuration files to assist in Documentum upgrade

Technologies: Documentum, Eclipse, HTML, Jakarta POI, Java, Javascript, JSP, WDK, WebLogic, WebTop, XML

J2EE/Web Contractor

Bell South Atlanta, GA **June 2005 – Nov 2005**

In less than half year finished prototype of departmental application scheduled for over 2.5 person-years, despite numerous obstacles including switching from Spring WebMVC before transitioning to Struts/WebLogic platform

Technologies:

Ant, Eclipse, HTML, Jakarta POI, Java, Javascript, JSP, Oracle, Spring, Struts, SQL, Tiles, WebLogic, XML

PHP Contractor

Scientific Atlanta Lawrenceville, GA **March 2005 – May 2005**

Developed various routines to supplement existing intranet/settop box software, including pagination of records

Technologies: Eclipse, HTML, Javascript, Linux, Oracle, PHP, SQL

J2EE/Documentum Contractor

Trane/American Standard Clarksville, TN **Sep 2004 – Feb 2005**

Supported Documentum web application through "go live" and directed offshore developer in development of significant additional features

Technologies: Ant, ASP, CSS, Documentum, Eclipse, HTML, Java, Javascript, JDBC, JSP, log4j, Servlets, VBScript, VSS, WDK, WebLogic, WebTop, XML

***Work endorsed on linkedin*

Perl Contractor

Mercer HR Consulting Louisville, KY **May 2004 – Sept 2004**

Developed Perl routines for transforming customer data in common format for use in Mercer software

Technologies: CVS, HTML, Javascript, MySQL, Perl, PHP, phpMyAdmin, XML

Experience prior to 2004 available upon request
